

EDUCATION

Areas: Network and Security, Wireless Network, Cloud Computing, AI for Distributed System

- Ph.D. student in Computer Science and Engineering, Michigan State University *2019 - now*
- M.S. in Computer Applied Technology, University of Chinese Academy of Sciences *2016 - 2019*
- B.S. in Information Security, Hunan University *2012 - 2016*

EMPLOYMENT

- Research/Teaching Assistant, Michigan State University *2019 - now*
Study 3GPP LTE(4G)/NR(5G) Standards, standards and find vulnerabilities in Radio Access Network and IMS Core Network. Launch proof-of-concept attacks on operators and software-defined radio.
- Research Intern, Los Alamos National Lab *10 weeks, 2021*
Built a simulation testbed of the cyber-physical system using Julia and generated a dataset. Developed a learning framework to infer the privacy of the cyber-physical system. Wrote the relevant part of the thesis.
- Research Intern, Alibaba *6 months, 2019*
Developed a robust deep learning model for traffic prediction based on distributed monitoring system of Alibaba cloud. Developed efficient algorithms for abnormal machine detection in clusters with thousands of machines. Wrote one paper and submitted two patents for the company.
